Introduction

This report contains locations and characteristics of the carpool parking lots administered by the Michigan Department of Transportation (MDOT). Lot information is arranged by MDOT Region and listed by facility name (most often the name of a nearby community). Monitored carpool parking lot characteristics presented in this report include specific location, capacity, reported weekday vehicle count in 2003 and surface type. The proximity of certain amenities such as lighting and pay phones as well as the presence of an entrance sign are also monitored.

Program Background

Michigan's Statewide Carpool Parking Lot Program was initiated during the energy crisis of the early 1970s. At that time, rising transportation costs caused by fuel scarcity prompted many motorists to begin carpooling on a larger scale than ever before. Lacking adequate and convenient parking facilities, commuters parked along roadsides and on private property. Potential safety problems associated with roadside parking provided the impetus for the development of the Statewide Carpool Parking Lot Program: an effort to provide safe and convenient parking facilities for Michigan carpoolers. Through the establishment of this program, MDOT has committed itself to the conservation of limited energy resources while responding to the needs of the state's travelers. Continued MDOT concern about safety as well as about air quality and congestion has led to further expansion of the program and the systematic improvement of existing carpool parking facilities.

The Statewide Carpool Parking Lot Program began as a pilot program in 1974 with eleven carpool parking lots located in five counties. Today, the system encompasses 211 carpool parking lots statewide providing commuters with 7,992 parking spaces, nearly 2,800 of which are occupied on the average weekday. The program is continuing to evolve and be improved as new lots are constructed, existing lots are improved and underused lots are closed.

Rideshare Program

Local Rideshare Offices (LROs) provide matching services for those interested in carpooling or vanpooling for the work commute. The thirteen LROs in Michigan are identified on page 4. If you are interested in finding others with whom to share a ride, please contact the agency closest to your work destination.
